WORKING PAPERS

- 2020** **Granular Gravity: Equity-Bond Returns & Correlation** , Job Market Paper
- I find strong empirical evidence that the correlation between firms bond and equity returns increases significantly when the distribution of firms in the economy becomes more granular than atomistic. Data supports the hypothesis that this arises from granularity being a priced factor in the cross-sections of both equity and bond returns. I show granularity commands a negative price of risk in the cross-section of corporate bond returns. I also verify that the expected return on a long-short strategy formed on granularity-sorted portfolios is significant and positive regardless of the credit-ratings of bonds.
- PRESENTED AT** HEC Montréal Finance Seminars (March 2021), HEC Montréal PhD Brownbags (March 2020), Global Finance Conference (May 2021), World Finance Conference (Aug. 2021), NOVA Finance PhD Countdown (Aug. 2021)*, Southern Finance Conference (Nov. 2021)*
-
- 2019** **Equity Prices in a Granular Economy**, with Harjoat Bhamra, Christian Dorion & Alexandre Jeanneret
- This paper revisits the properties of the conditional CAPM when the economy is granular. When some firms are more like "grains" than atoms, shocks to such firms are not diversified away. When a large firm becomes larger, the economy becomes more granular, as the large firm represents a greater share of the market. This increase in granularity translates into a higher cross-sectional difference in equity betas, which reduces the slope of the Security Market Line (SML). We provide empirical support for the negative relation between the slope of the SML and various granularity measures from the U.S. equity market. When granularity decreases, portfolio betas are strongly and positively related to average equity returns. In contrast, the relation turns negative when granularity increases, thereby explaining the relatively "flat" SML observed unconditionally.
- PRESENTED AT** Northern Finance Association (Sep 2020), Université Laval (Feb 2020), HEC-McGill Winter Workshop (March 2020)

TEACHING

- 2021** Lecturer, *Futures and Options (B.Com.; Median Evaluation 5/5)*, HEC Montréal
- 2021** Teaching Assistant, *Derivatives Pricing (M.Sc.)*, HEC Montréal
- 2020** Teaching Assistant, *Market Risk Management (M.Sc.)* , McGill University

* Scheduled for presentation

2018	Teaching Assistant, <i>Financial Econometrics (M.Sc.), Corporate Finance (B.Com.)</i> , HEC Montréal
2011-2013	Part-time Lecturer, <i>Investment Analysis by COMFAR III</i> , B.A. in Economics, University of Tehran

SCHOLARSHIPS & AWARDS

2020	SSRCH Doctoral Fellowship. 20,000 CAD <i>By Social Sciences and Humanities Research Council</i>
2020	Travel Grant . 750 USD <i>By American Finance Association</i>
2019	Pierre Arbour PhD Scholarship . 17,000 CAD <i>By Pierre Arbour Foundation</i>
2019	Hydro Québec PhD Scholarship . 20,000 CAD <i>By Hydro Québec</i>
2018	Jean-Louis Mercier PhD Scholarship . 6,000 CAD <i>By Jean-L. Mercier</i>
2016-20	PhD Entrance Scholarship. 80,000 CAD <i>By HEC Montréal</i>
2015	Graduation Excellence Award. 2,000 CAD <i>By Concordia University</i>

PROFESSIONAL EXPERIENCE

JULY 2021	Society of Financial Econometrics (SoFiE) Summer School Kellogg School of business. Chicago, Illinois, USA (Virtual)
JULY 2019	Society of Financial Econometrics (SoFiE) Summer School Kellogg School of business. Chicago, Illinois, USA.
2018	Academic Writing Workshop HEC Montréal
2018	CEAR-RSI Household Finance Workshop Hotel Saint Sulpice. Montréal, Canada.

OTHER

DISCUSSION	World Finance Conference (2021), Global Finance Conference (2021).
LANGUAGES	English (Fluent), French (B2), Arabic (Fluent), Persian (Native).
